Maximize the value of your SaaS applications

Meeting the challenge of controlling SaaS spend

Reduce SaaS vendor spend

Discover and rein in shadow SaaS

Assess current SaaS usage

**Optimize subscriptions based on usage**

Rein in SaaS spend

ServiceNow, Salesforce, Workday, Microsoft. What if you could shave off even a few percentage points from your SaaS costs for each of them? With Flexera One SaaS Management, you get a current and complete picture of SaaS usage to support your business stakeholders, while optimizing SaaS spend with all your vendors. Flexera lets you discover SaaS and automatically optimize subscriptions based on actual usage. SaaS Management recommends the optimal subscription value and enables rightsizing of subscription levels based on user activity.

> *"We started discovering our SaaS applications and quickly realized we have four applications for everything and eight contracts with Salesforce. We've been able to clean all this up to simplify and secure what we have."*
>
> **VP Procurement**
> Consumer goods industry
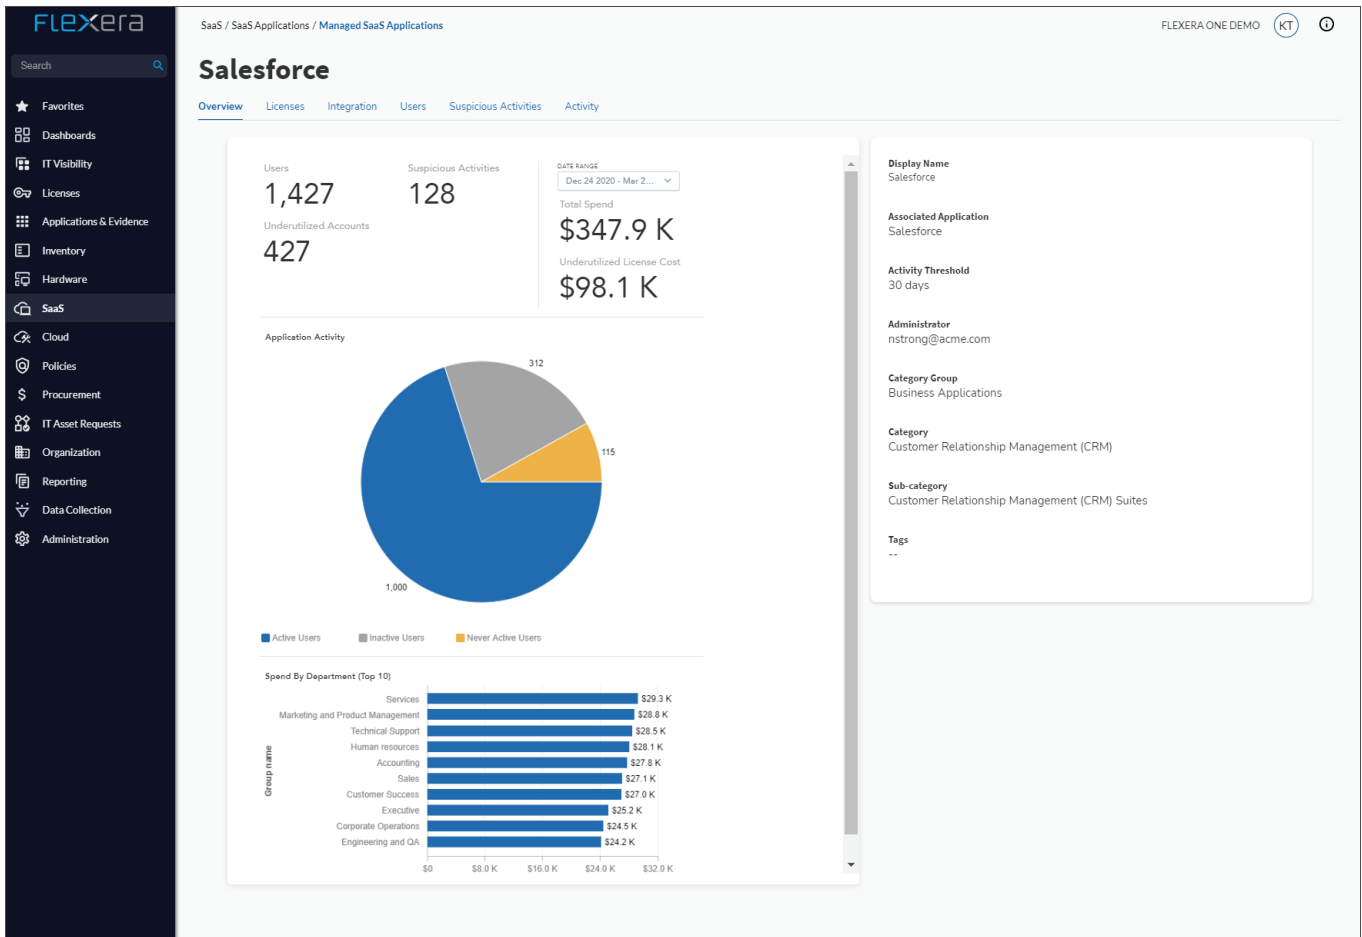

Flexera One SaaS Management delivers visibility of app usage and trends across the enterprise.

Rationalize your SaaS portfolio

SaaS sprawl continues to introduce duplicative SaaS applications, which reduces your ability to leverage buying power with strategic vendors. Flexera One discovers the SaaS applications being used, and with the power of Technopedia —the world's most comprehensive repository of IT asset data—enriches discovered data with categorization and pricing tiers.

Automation to increase the security posture of your SaaS applications

Flexera One's powerful policy engine enables you to take automated actions so you can be confident your SaaS applications are secure. You can automatically deprovision users so they no longer have access to company data in SaaS applications as they leave the organization. And you can protect your valuable IP stored in SaaS applications by securing files, data and other content.

"Managing SaaS used to be out of sight, out of mind. But when we went through a big Salesforce renegotiation we needed more visibility. Flexera showed us we had inactive accounts and helped us identify areas of redundant or overspend. We won't make the same mistake next year—now we have insight into what's going on."

Director, Indirect Sourcing

Flexera One SaaS Management helps you maintain application security and control spend.

A detailed look at Flexera One SaaS Management

KEY FEATURES	FLEXERA DIFFERENCE
Discover SaaS apps	• Gain total visibility of SaaS applications accessed in the environment • Identify, categorize and normalize SaaS applications (powered by Technopedia) • Detect unwanted SaaS applications to stay compliant with regulations such as GDPR and HIPAA
Optimize SaaS spend	• Identify waste from unused or inactive subscriptions • Automate deprovisioning of inactive subscriptions • Rightsize SaaS subscription levels based on usage
Secure your valuable data	• Automate processes to remove access, data and storage to protect your invaluable data from unauthorized access
Proactively manage SaaS renewals	• Visibility of spend across on-premises, SaaS and cloud so you can negotiate with vendors like Microsoft, IBM, SAP and Oracle who offer a wide range of products • Track SaaS auto-renewals and key dates to develop a renewal strategy
Rationalize redundant SaaS	• Categorize SaaS so you can leverage your buying power with fewer vendors • Catalog approved SaaS applications to control sprawl
Automation to eliminate mundane tasks	• Automate provisioning and deprovisioning of SaaS users • Deep-integrate with SaaS vendors to take action such as removing data or documents as employees leave
